Solution

PERI offered an Open Source framework based hosted comprehensive solution including necessary hardware, application, integration support and maintenance from the date of commencement of the project. PERI team was responsible towards development and customization of different modules and integrated it into the company existing Enterprise System in a phased manner. Using internationally followed best practices and standards, PERI ensured that every module undergoes comprehensive testing as part of our SDLC processes. PERI engineers followed compliant Quality mechanisms to ensure compliance of the product prior to its release and deployment. PERI team provided an adequate end user and admin level training as per the implementation schedule for effective functioning of the system.
